

# SHARATH B SOMASHEKARAI AH

500 WALL ST.1314, SEATTLE, WA 98121  
Ph.: +1 2067735287 Email: sharab@amazon.com

PROBLEM SLOVER | CONSTANT LEARNER  
| THINKER | STORYTELLER | METHODICAL | AMBITIOUS | ADAPTABLE

Starting my career in a non tech role, to be a **Sr.BI Engineer**, I have done what the role demands and fortunately it was in my self-interest too. During this journey, I have got into various roles like Catalog Associate, Subject Matter Expert, Business Analyst and BI Engineer in teams such as Operations, Retail, Program, Product, Analytics and Finance. These roles have taught me about a wide array of data problems and how to solve them as per customer needs. It has also taught me about making & managing tough decisions with clear communication and expectations.

To summarize, I would like to call myself a true agilest, with the right balance of technical and functional capabilities.

Outside work, I love to explore new things and do anything for an adrenaline rush within my limits. My current interests are riding motorcycles, YouTube Vlogging and Skiing. Apart from activities, I also like human Psychology, Philosophy, Leadership and Mindfulness. As a side gig, I do day/swing trading and working on building algo trading system. Lastly, I will also be ideating cool solutions for world problems in spare time & dreams.

A role with a broader scope of data problems where it is not just limited to reporting. I.e. using scientific methods to solve a problem to have a satisfaction of solving an impactful problem.

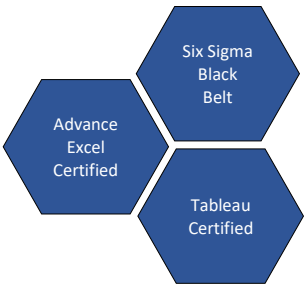

A role of a BI engineer along with scope of Data science and Technical Program Manager or Product Manager-Tech would be ideal.
